

Academic Consistency Tech Proficiency Co-curricular Excellence Team Management				
Degree	Board	Institute	Percentage	Year
B. Tech.	SOA University	Institute of Technical Education and Research	84.50	2023
HSC	C.B.S.E.	St. Xaviers High School	84.60	2019
SSC	C.B.S.E.	St. Xaviers High School	95.00	2017
WORK EXPERIENCE (23 Months)				
Teaching Assistant		Interface Software		Jul'23 - May'25
AI Product Innovation Customer Centricity Stakeholder Management				
Roles & Responsibilities	- Mentored 250+ learners in full stack, lifting the pass rate by 10% through coding and hands-on data exploration - Designed Python-based analytics labs: NumPy, Pandas & Matplotlib to teach visualization and data distributions - Built reproducible EDA notebooks and automated data-cleaning workflows in Python to generate visual reports - Designed feature flows & user stories for MERN lab & Figma prototypes across 20+ batches, aligning the needs Created & maintained product-like SOPs, workflow diagrams and release notes for labs, improving consistency Optimized MERN architecture and API endpoints to ensure scalable performance for student applications			
Initiatives & Achievements	Qualified for Python by applying on datasets, then reusing those workflows to improve lab design and reporting - Clarified concepts with examples and earned positive feedback for communication, patience and approachability Streamlined workflows and feedback loops to improve understanding, coding quality and student performance - Elevated learning outcomes and engagement by standardizing code reviews, EDA notebooks and LMS-based sets			
INTERNSHIP (1.5 Months)				
Data Science Intern		RINEX		Nov'21 - Dec'21
Roles & Responsibilities	- Built EDA reports and decision dashboards on 50+ datasets, providing product & business stakeholder's insights Integrated and analyzed datasets to generate highly actionable insights supporting the decision-making process - Developed AI-driven decision-making models for advanced and efficient data exploration across diverse datasets			
CERTIFICATIONS				
HelloPM Fellowship	Pursuing HelloPM AI Product Management Program, learning product strategy, analytics, and execution - Applying structured product thinking through live assignments, case, prioritization, and experimentation - Developing practical exposure to AI-enabled product workflows, user research, metrics, and growth levers			2026
Product Analytics	- Proposed feature deprecation via Adoption-Retention Matrix, theoretically reducing technical debt by 15% Implemented the Product Analytics Hierarchy to advance organization towards Data Actualization - Constructed business case aligning product outcomes with business goals to justify roadmap investments			2025
AI for Product Management	- Formulated AI strategies driving product-led growth, automating workflows to enhance conversion rates Leveraged Generative AI to accelerate development, automate user stories, personas and optimize tasks - Applied Agentic AI to analyze customer feedback and usage data, enabling data-driven discovery decisions			2025
Lean Six Sigma: Green Belt	- Completed Lean Six Sigma Green Belt training applying DMAIC, SIPOC, VOC and CTQ frameworks Optimized business processes and minimized defects using statistical analysis and root cause frameworks Applied Lean principles to drive waste reduction, cycle-time improvement and continuous improvement			2025
Agile Project Management & Scrum Fundamentals	- Acquired the knowledge of Scrum, Kanban, and Lean frameworks, utilizing Jira for agile project tracking Developed proficiency in Agile methodologies and sprint planning, learning to manage workflows tools - Learnt Scrum and Agile principles via case studies, applying Asana and Trello for backlog management			2025
PROJECTS				
Froggy: Agentic Product Copilot	Conceptualized FROGGY, an autonomous agentic AI system designed to automate complex workflows Engineered agentic reasoning loops to orchestrate seamless task execution across emails, PDFs, Doc, etc. - Designed end-to-end automation features for report drafting, reducing manual effort and cognitive load			2025
Insight Engine: Power BI/SQL	Orchestrated 10+ scalable data products integrating Snowflake and BigQuery for strategic analytics Modeled robust Star Schemas and pipelines to ensure secure and scalable data for decision-making Transformed raw metrics into actionable product insights using DAX and live interactive dashboards			2025
AQI Monitoring System	- Built IoT AQI monitoring MVP using calibrated multi-sensor nodes & real-time telemetry data pipeline Deployed LSTM predictive models on live streams to forecast trends and trigger risk mitigation alerts Launched actionable dashboard surfacing forecasts and KPIs to accelerate the hazard response times			2023
ACADEMIC & CO-CURRICULAR ACHIEVEMENTS				
Scholarships	Earned State Medhabruti and University performance scholarships totaling ₹1.8 Lakhs for academic merit			2019
Exhibitions	Delivered 20+ freelance and 50+ portfolio assets, translating client requirements to boost business visibility			2019
Awards	Awarded ₹20,000 cash prize and merit certificate for achieving a perfect 10.0 CGPA in 10th board exams			2017
EXTRA CURRICULAR ACTIVITIES & INTERESTS				
Social Service	Coordinated fundraising for Odisha Development Management Program and InAmigos Foundation			2022
Sports	Represented handball & volleyball in state-level; reflects teamwork, discipline and high-pressure resilience			2016
Interests	Capturing moments and composing creative visuals through photography, focusing on art of uniqueness			2019
